Description

The Hermione, the frigate famous for having taken La Fayette to America to join Washington and the rebel colonists, was wrecked and lost off the coast of France in 1793. An Association decided to embark on the appealing but difficult adventure of constructing a faithful replica in the same dockyard at Rochefort in which the original Hermione had been built. The Hermione is now ready to sail across the Atlantic, 234 years after the voyage of her ancestor. It is the story of this fascinating reconstruction that is told with warmth and professional competence by Jean-Marie Ballu, a leading specialist in wood for shipbuilding and in shipwright's techniques.
